WHO WE ARE

We are an online platform that increases the productivity of software developers.

We help our clients improve their software manufacturing processes by generating code through graphical interfaces, reducing development time and costs.

NIGMA's solutions were developed through analysis of the most relevant market needs, following current application trends and employing the most efficient systems available that allow users to design and develop in a controlled and reliable environment.

WE ARE NIGMA

NIGMA is an ecosystem of applications for the IT project development and management in a completely online environment.

It allows the development of web, mobile or desktop applications through graphical interfaces, generating 100% readable standardized code in different programming languages with the methodology: **What You See What You Get (WYSWYG)**.

Our platform is limited to the "Low-Code" industrial sector.

TOTAL SOLUTION

ORACLE

.NET

nigma

INTEGRATIONS

NIGMA can integrate multiple services such as: NoSQL, Web, Services, REST, gRPC, Search Tools, SMS, SMTP, among others

Web Interface

ASP.NET Core

Spring Boot

Laravel

Mobile

Android Kotlin

iOS Swift

Database

Oracle

DB2

SAP HANA Microsoft

SQL Server MySQL

PostgreSQL SQLite

Desktop

Windows Forms

NoSQL

Couchbase

MongoDB Apache

Cassandra

Elastic Search

Splunk

Solr

Services

REST

WSDL

gRPC

Azure Blob Storage

Amazon S3

Design

Bootstrap

Foundation

Materialize

MVV

jQuery

Angular

React

Vue.js

Others

Google

Bing

ClickSend

OUR ECOSYSTEM

It features collaboration and management tools similar to Zoom, Microsoft Project, Google Calendar, etc., all integrated into a single work environment.

**Work Plan Change
Control Reports
Activity Control
Budget Notes
Methodology
(MAAGTICS)**

**Email
Calendar
Third-Party Integration**

**Chat, Video
Conferencing, Profile,
Shared Files, Virtual
Assistant, Support
Platform**

**Web IDE Version
Control Technical
Documents User
Manuals Editor Design
Database Exploiter**

ADVANTAGES COMPETITIVE

NIGMA is the total solution for the development of your projects.

1

Scalable

Any programming language can be integrated.

2

Native

Generate code according to technology.

3

Extensible

Native code and libraries can be added.

4

Integral

All the teams of development, design and administration, they can work in the same environment.

5

Visual

Results are obtained in real time as you model and create.

6

Fast

In addition to optimizing development times (60%-80% faster), it generates technical and administrative documentation.
